## Matrix model of a Professional Personality

		DIMENSIONS OUTSIDE WORLD		
		DYNAMIC	SOCIAL	FUNCTIONAL
FORCES INSIDE WORLD	LIVE	EXPLORE	SEND	DO
	SURVIVE	BRAKE	RECEIVE	THINK
	ORIENTATE	STEER	DICTATE	NOTE

A Professional Personality evolves as a membrane between forces or energy from the Inside World and dimensions from the Outside World. Three basic forces form the energy in the Inside World; Live, Survive and Orientate. The Outside World offers three dimensions; Dynamic, Social and Functional. These dimensions seduce and limit the forces of the Inside World.

Everywhere a force meets a dimension, a basic behavioral process arises.

A Professional Personality is formed by the unique way forces from the Inside World are divided over the dimensions in a professional context = the Outside World. BasicProfileScreen measures this distribution, using 9 simple verbs and associated scores: 3 forces x 3 dimensions.
